

STATE ARCHITECT LARRY FRIEDBERG

Larry Friedberg is the State Architect and directs the Office of the State Architect for the State of Colorado. In his over sight role Larry is responsible for establishing policies and procedures for the administration of the state's capital construction process at each state agency and institution of higher education. This process includes: solicitation and procurement of design and construction services, establishing standard contract language, project man-

agement, code compliance, energy conservation and performance contracting, technical support and annually recommending a prioritized list of projects to be funded to the state legislature. Additionally, the state's centralized leasing process, design/build/lease performance criteria and strategic planning are administered through the Office of the State Architect.

Larry has 36 years experience in the design and construction industry including: 16 years in private practice as a architect in both Illinois and Colorado, 5 years as the inhouse Architect and Facilities Manager at University Hospital on the Colorado Health Sciences Center Campus and 15 years in his current position with the state.

Larry is a licensed architect, a Colorado Board member of the American Institute of Architects and a graduate of the University of Illinois.
